MedWaste TrackerSM

Helping you safely dispose
of used needles.

THINK GREEN®

Protect yourself, the community and the environment from loose needles.

"I wouldn't wish a needlestick injury on anyone. That's why I use the MedWaste Tracker to keep my used needles away from the public and out of the environment."

ELIZABETH JENNINGS, diabetes patient

A complete, carefree system.

If you inject medications from home, here's a convenient way to help prevent needlestick injuries. Introducing MedWaste Tracker.SM

The MedWaste Tracker lets you safely contain the sharps and lancets used in your personal healthcare program. When the Tracker is full, simply mail it back to us for environmentally correct treatment and disposal. Everything you need – including box, postage and label – comes with the system.

Ideal for use at home.

Managing your injections and needle waste effectively is part of managing your overall healthcare. The MedWaste Tracker makes it simple, convenient, and affordable.

Why not simply put your used needles into a hard-body detergent or bleach bottle and set it out with your regular trash? This sounds reasonable. But did you know that those kinds of containers can burst when the trash is compressed? This is how they can become a hazard to municipal workers and the public.

UP TO 800,000 PEOPLE are injured from improperly handled and discarded sharps every year in this country.

Used needles can also fall into the hands of individuals who use them illicitly. The MedWaste Tracker lets you keep needles out of curbside trash.

Safe, lawful needle disposal.

The MedWaste Tracker is the kind of system recommended by the Environmental Protection Agency (EPA) for safe needle disposal. It's a total system, providing for containment, collection, and destruction of the used needles.

EACH MEDWASTE TRACKER INCLUDES:

- A puncture-resistant sharps container
- Postal-authorized return
- Prepaid postage
- Environmentally responsible treatment and disposal
- Documentation of the disposal.

A growing number of states are passing legislation to make it illegal to place used sharps and lancets in with regular household trash. To learn more about syringe disposal regulations, visit ThinkGreenFromHome.com.
